1 = LOCATION	This explains where on the vehicle the parts are to be fitted. I.e., Front or Rear suspension.
2 = DESCRIPTION	This is the area of the suspension that the SuperPro part is designed to locate into.
3 = PART NO	This is the SuperPro number allocated to each suspension part. A # symbol at the end of this number (where applicable) denotes where some parts are possibly in Research & Development process.
4 = KIT	E.g. 1 = One kit required to service both sides of the vehicle. 2 = Two kits required to service both sides of the vehicle. 3 = Three kits and so on
5 = CONTENTS	This lists how many bushings, tubes, shells etc., are packaged in each single kit.
6 = NOTES	This area gives important information for the correct fitment of a SuperPro kit i.e., accurate measurements and special fitting notes.

WARRANTY STATEMENT

All SuperPro Suspension components, which are supplied for the specific applications listed in the catalogue and are fitted according to SuperPro fitting guidelines, are covered by a **3-year or 60,000km** limited warranty from the date of purchase.

The warranty is limited to replacement of the faulty component only, and does not cover the cost of removal and replacement and consequential damage, where this limitation is permitted under Australian State and Federal Legislation.

All warranty returns must be submitted by an authorised SuperPro Distributor and must be correctly tagged for identification purposes.

FEATURES OF SUPERPRO POLYURETHANE

If you are looking for:

- Better road holding
- Constant steering geometry
- Increased tyre life
- More responsive steering
- Longer service life of suspension components

Then look no further - The SuperPro range of polyurethane suspension bushings can provide you with all these advantages.

At SuperPro we continually develop and refine the design of polyurethane suspension components and from this we can offer an extensive range of technically superior passenger vehicle and 4WD products.

- Engineered Designs
- Material
- Research and Development

ENGINEERED DESIGNS

SuperPro designs incorporate the latest technology in polyurethane as developed by the superior SuperPro Research and Development Team.

Design features such as bullet grooves, knurled and spiral bores and grease grooves ensure that the product performs to the highest standard without transmitting any excess noise, vibration and harshness (NVH).

SuperPro components are produced to the highest achievable tolerances for polyurethane. This is essential for the correct fit of each component resulting in the life of the product being maximised and to ensure that the vehicle componentry is not over stressed and damaged. All the steelwork used in the product range is precision machined for precision fitment.

MATERIAL

The polyurethane that is specifically blended for the SuperPro product has mechanical properties that make it extremely successful in its application.

The properties of extreme resistance to abrasion, low compression set, high tear strength and a resistance to oils and solvents make SuperPro's polyurethane ideal for automotive applications. These properties lead to a resilient product that is highly versatile in its applications.

FEATURES OF SUPERPRO POLYURETHANE (CONT...)

RESEARCH & DEVELOPMENT

Research and development is critical in the continual improvement of the SuperPro product. The gathering of information used to improve the product never ends:

- Constant re-engineering and testing on Fulcrum's own fleet of cars and four-wheel-drives.
- Cyclic testing performed on specifically designed testing equipment offers valuable information on the products durability.
- Customer feedback leads to better products.
- The heat, dust, harsh roads and vast expanse of Australia and the race circuits, rally trails, speedways and drag strips provide the perfect test bed to ensure top performance and reliability.
- Successfully tested in the diversified climates of Africa, Asia, Australasia, Europe, Middle East, South Pacific, UK and USA.

STEELWORK

The crush tube is an integral component of the suspension bush system and is necessary for free pivoting. The crush tubes are made to precision tolerances to ensure that the precise fit is maintained.

Wherever an outer shell or sleeve is used in the SuperPro product range you can be assured that it is also made within precise tolerance ranges.

THE DOUBLE HELIX

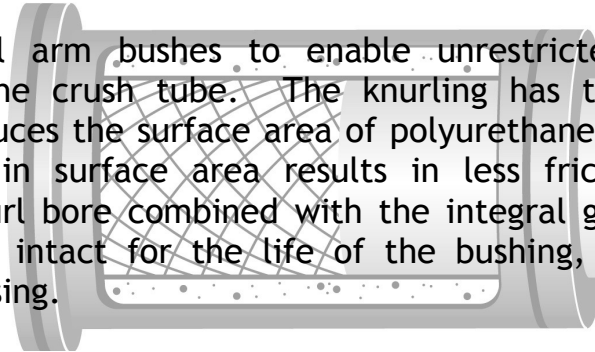

The double helix is a design feature that has lead to improvements in the SuperPro product. The double helix is used in two applications. The first is on the inside of the bush and the second is on the outside diameter of the crush tube.

The first design of the double helix is used primarily on shackle bushes. The double helix provides a region for grease to travel along. This allows a boundary layer of grease to form between the inside diameter of the bush and the outside diameter of the tube. The double helix is extremely successful in greaseable shackles as the grease can travel from the center of the bush along the helix and out to the grease grooves in the head of the bush.

FEATURES OF SUPERPRO POLYURETHANE (CONT ...)

KNURLING

Knurling is used on control arm bushes to enable unrestricted pivoting of the polyurethane bush around the crush tube. The knurling has two inherent design advantages. The knurling reduces the surface area of polyurethane in contact with the crush tube. This reduction in surface area results in less frictional forces being developed. The SuperPro knurl bore combined with the integral grease retention lips keeps the lubricating grease intact for the life of the bushing, and eliminates the necessity for periodic re-greasing.

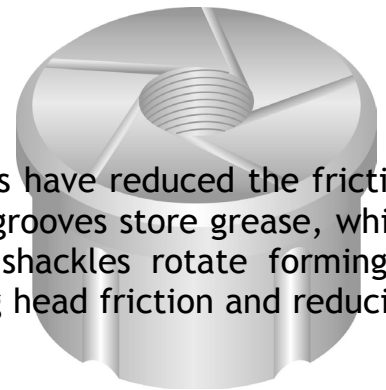

BULLET GROOVES AND VOIDING

Bullet grooves are incorporated in the design of SuperPro bushes to allow for variances in control arm or spring eyes.

The voiding and bullet grooves also allow for the transgression of displaced polyurethane into the volume of the grooves as load is applied during normal vehicle operation. Even though polyurethane is in a solid form when it is manufactured into bushes, its unique properties enable it to flow in a manner similar to a liquid when loaded. The action of the bush flowing into its voids prevents the generation of harshness and NVH within the bush and its mount.

TANGENTIAL GREASE GROOVES IN HEAD

The tangential grease grooves in the heads of shackle bushes have reduced the friction between the head of the bush and the shackle plates. The grooves store grease, which is smeared around the mating surfaces when the spring shackles rotate forming a lubrication boundary layer. This has the effect of minimising head friction and reducing noise.

TECHNICAL & MARKETING SUPPORT

At Fulcrum we are committed to technical excellence and customer service.

VR to VS Series 1993 - 1/2001

Front	Coil Spring Spacer Bushing	SPF2365-5K	2	1B	
Front	Coil Spring Spacer Bushing	SPF2365-10K	2	1B	
Front	Control Arm Lower - Inner Bushing	SPF0842K	1	2B,2T	
Front	Spring Insulator Bushing	SPF2498K	1	2B	Upper replacement of OE # 92002882
Front	Strut Bar	SPF1630K	1	No bushes	Fixed +2.0° Strut bar only, use SPF0240K, SPF0756K
Front	Strut Bar To Chassis Mount Bushing	SPF0240K	1	2B,2T	
Front	Strut Bar To Lower Control Arm Bushing	SPF0756K	1	4B,2T,4W	
Front	Sway Bar Link Bushing Kit	SPF0994K	1	8B	Bushes only to suit after-market sway bar & SPF0987K
Front	Sway Bar Link To Strut Kit	SPF0987K	1	8B,4N,8W,2R	H/Duty link rod & bushes
Front	Sway Bar Mount To Chassis Bushing	SPF1453-__K	1	2B	Measure bar dia 14, 16, 18, 19, 20, 23, 24, 25, 26, 27, 28, 30
Rear	Bump Stop - Shortened	SPF0601K	1	2B	Suit lowered suspension "Use with OE Foam bumpstop"
Rear	Bump Stop - Shortened	SPF0601SLK	1	2B	Suit Extra lowered suspension "Remove OE Foam"
Rear	Panhard Rod Bushing	SPF1051K	1	2B,1T	Fits "Fulcrum Formula" adjustable panhard rod only
Rear	Panhard Rod Bushing	SPF0030K	1	2B	Solid axle rear
Rear	Shock Absorber - Lower Bushing	SPF2178-16K	1	2B	
Rear	Shock Absorber - Upper Bushing	SPF0201K	1	4B	
Rear	Spring Insulator Bushing	SPF0385K	2	1B	Solid axle, standard height vehicle
Rear	Spring Insulator Bushing	SPF0385-5K	2	1B	Solid axle rear, raises vehicle approximately 6mm
Rear	Spring Insulator Bushing	SPF0385-10K	2	1B	Solid axle rear, raises vehicle approximately 12mm
Rear	Sway Bar Link Bushing Kit	SPF2092K	1	8B	
Rear	Sway Bar Mount To Axle Bushing	SPF0589-__K	1	2B	Solid axle rear, measure bar diameter 14 to 27mm ava
Rear	Trailing Arm - Lower - Front Bushing	SPF0016K	1	2B,2T	Solid axle rear
Rear	Trailing Arm - Lower - Rear Bushing	SPF0017K	1	2B,2T	Solid axle rear
Rear	Trailing Arm - Upper - Bushing All	SPF0977-90K	1	4B,4T,4S	H/Duty machined outer shell (Performance application)
Rear	Trailing Arm - Upper - Bushing All	SPF0977-80K	1	4B,4T,4S	H/Duty machined outer shell (Performance application)

1) Mk1, Mk2, S-type & Daimler V8

Sedan

	Mirror Steady Bushing	SPF1274K	1	2B,2T	
Front	Control Arm Lower - Inner Bushing	SPF0286K	1	8B,4T	Replaces OE # C8673
Front	Control Arm Upper - Inner Bushing	SPF1199K	1	4B,4T	Replaces OE # C8672
Front	Drag Link Pivot Bushing	SPF1847K	1	4B	
Front	Engine Steady Bushing	SPF1274-1K	1	1B,1T	Replaces OE # C10940
Front	Radiator Support Mount Bushing	SPF0809K	2	4B	Replaces OE # 8975
Front	Sway Bar Mount To Chassis Bushing	SPF1137-__K	1	2B	OE# C14983, Suits early C15097 clamp, measure bar
Front	Sway Bar Mount To Chassis Bushing	SPF1133-__K	1	2B	Suits late C32929 clamp, measure bar diameter
Front	Sway Bar To Link Bushing	SPF1274SSK	1	2B,2SST	Replaces OE # C10940
Front	Sway Bar To Lower Control Arm Bushing	SPF2092BK	1	8B	Replaces OE # C10996
Rear	Trailing Arm - Bushing Kit	SPF0760K	1	8B	Replaces OE # C8949, S type, Re-use Original tube
Rear	Trailing Arm - Lower - Rear Bushing	SPF0789K	1	2B,2T	Replaces OE # C17146, S type only

2) Mk4, Mk5, Mk7, Mk9 XK120, XK140, XK150

Sedan

	Gear-linkage Bushing	SPF1993K	1	1B	Auto, Mk7, Mk8, Mk9 1954 - 1962
Front	Control Arm Lower - Inner Bushing	SPF0758K	1	8B,4T	Replaces OE # C3021
Front	Control Arm Upper - Inner Bushing	SPF0757K	1	8B,4T	Replaces OE # C3003, Also "D" Type
Front	Radiator Support Mount Bushing	SPF0809K	1	4B	Replaces OE # C3053
Front	Sway Bar Link Lower Bushing	SPF1212K	1	2B	Replaces OE # C3050
Front	Sway Bar Link To Lower Arm Bushing	SPF0809K	1	4B	Replaces OE # C3053
Front	Sway Bar Mount To Chassis Bushing	SPF1137-__K	1	2B	OE# C3056 early, XK120 C16633 later, Measure bar dia
Rear	Shock Absorber - Lower Bushing	SPF0718-80K	1	2B	Replaces OE # C3273
Rear	Shock Absorber - Upper Bushing	SPF0809-70K	1	4B	Replaces OE # C3053
Rear	Trailing Arm - Upper Bushing	SPF0760K	1	8B	Mk 1 & Mk 2 only, Torque arms "Use OE tubes"

3) Mk10, 420, 420G

Sedan

Front	Control Arm Lower - Inner Bushing	SPF0286K	1	8B,4T	Replaces OE # C8673
Front	Control Arm Upper - Inner Bushing	SPF1199K	1	4B,4T	Replaces OE # C8672
Front	Sway Bar Mount To Chassis Bushing	SPF1137-__K	1	2B	OE# C14983,Suits early C15097clamp,Measure bar dia
Front	Sway Bar Mount To Chassis Bushing	SPF1133-__K	1	2B	Suits late C32929 clamp, measure bar diameter

UNIVERSAL SUSPENSION COMPONENTS

ENGINEERED BUMP STOPS

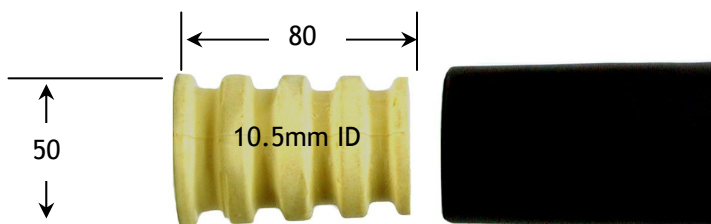

SPF1832K - SPF1833K - SPF1833BK - SPF2044K

SPF1832K offers a universal fitment for 4 & 6 Cyl lowered height vehicles with a strut type suspension. The fitment of lowered coil springs requires a firmer shorten bump stop to control ride and allow suspension travel.

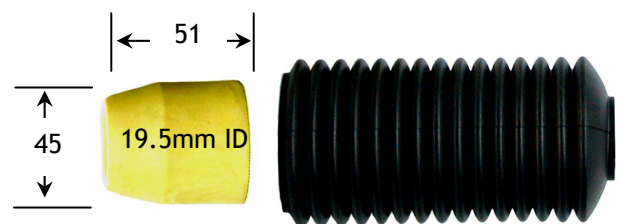

SPF1833K offers a large universal fitment range on all types of suspensions where the bump stop works on a 10-14mm damper shaft. The bump stop is designed so it can, be accurately trimmed to give the precise amount of control with maximum travel.

SPF1833BK offers a universal fitment for 4, 6 & 8 Cyl lowered height vehicles with a strut type suspension. The fitment of lowered coil springs requires a firmer shorten bump stop to control ride and allow suspension travel.

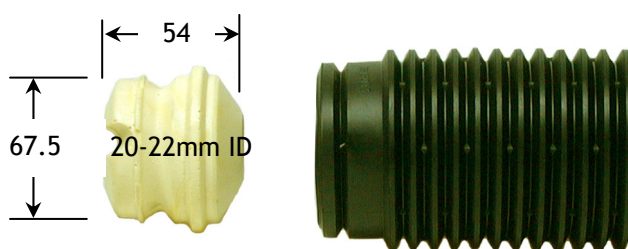

SPF2044K offers a large universal fitment range on all types of suspensions where the bump stop works on a 14 - 18mm damper shaft. The bump stop is designed to give the precise amount of control with maximum travel.

Slippery stuff...

Polyurethane bushing grease from SUPERPRO.

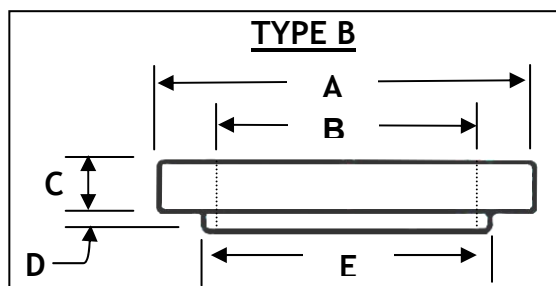

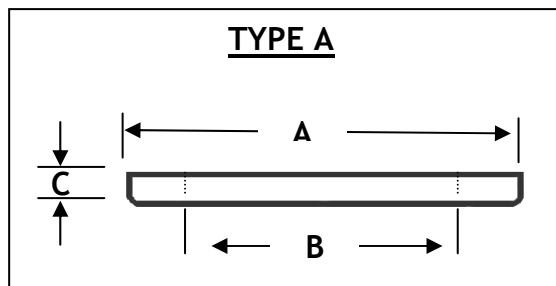

Twelve months of extensive research and development has gone into SuperPro's bushing grease - specifically engineered to compliment the already outstanding performance of our polyurethane suspension bushings.

The environmentally-friendly grease requires sparse application, making it cost effective to user. It offers nil-penetration into polyurethane, resulting in zero breakdown of the bushing, in turn providing consistent lubrication and exceptional wear-life.

- ❑ 12 months extensive R & D
- ❑ Nil Penetration into Polyurethane
- ❑ Nil Polyurethane breakdown
- ❑ Increased life span of bushings
- ❑ Water Proof Capabilities
- ❑ Consistent lubrication
- ❑ Specifically designed for Polyurethane
- ❑ Packaged in easy to store 500g tubs
